- ◆ Products can be stored as long as they are in an airtight container
- ◆ Competitive price
- ◆ Expert service in application as needed

Ecoselection oils can also be applied to concrete, slate, hemp and lime finishes

## The steps of oil application

1. shake the product well

2. Apply with a rag, a brush, a roller or with the oil applicator

*5 to 10 minutes of waiting before wiping for color and 45 minute wait before wiping for the clear product.*

3. Wiping with a clean, dry cloth

*\* this stage is crucial*

12 hour minimum wait before the application of the second layer and minimum 24 hours between the second and third layer

**Consult the container to dispose of your applicators and soaked cloths in a safe way.**

While waiting for complete drying, you can walk on the surface with dry and clean stockings.
