

# BEAUTY AND STRENGTH FROM WITHIN

— C2 GUARD —  
**The Ultimate Waterproof for  
Wood and Masonry Surfaces**

# ABOUT C2 GUARD

C2 GUARD is a non-toxic waterproofer and sealer designed for use on unsealed wood and concrete surfaces. Its unique formula absorbs deeply into the surface, forming a flexible polymer barrier that becomes part of the cellular structure. This enhanced structure helps prevent the effects of mold and mildew, dry rot, cracking, peeling and cupping of wood. For concrete, C2 Guard helps prevent corrosion and spalling; protects against the effects of mold, mildew and pool chemicals; and eases ice and snow removal.

USE ON any interior or exterior wood surface such as decks, shingles, siding, fencing, railings, flooring, log homes, structural framing, children's play structures, bleachers and planters. Use as a pre-treatment for paint, stain or clear coats on new or refurbished wood surfaces.

## C2 GUARD WOOD

- Prevents water intrusion
- Non-toxic
- Enhances wood stability
- Prevents the effects of mold and mildew
- Use as a pre-treatment for stain
- Use as a clear coat on new or refurbished wood

# STAIN COLORS

Stain colors are designed for use with C2 Guard for Wood on properly prepared interior and exterior wood surfaces.

## C2 GUARD MASONRY

- Prevents water intrusion
- Non-toxic
- Protects against salts and chemicals
- Resistant to freeze/thaw damage
- Use on concrete or masonry surfaces

**USE ON:** walkways, driveways, curbs, loading docks, floors, parking decks, stucco, brick, tile (unglazed), limestone, granite, marble (unpolished) and slate.

## C2 GUARD FUSION

C2 FUSION is an innovative combination of 65% C2 Guard with 35% polyurethane. It maintains the same nanoparticle waterproofing technology as the other Guard products, with the addition of aliphatic polyurethane. The combination of polyurethane and C2 Guard tints provide increased abrasion resistance and additional UV protection. The soft, low luster sheen reveals incredible depth of color. Note: C2 FUSION is not designed as a clear coat. It must be used with C2 Guard tints.

- Low-luster finish
- Non-toxic
- Non-yellowing
- Stain, abrasion & UV resistance
- Long-lasting protection
- Easy clean-up
- Fast-drying

**USE ON:** decks, siding, railings, fences, shingles, play structures, bleachers, log homes, outdoor furniture, garden beds and timber frames.

C2 Guard eco-friendly waterproofers provide long-lasting protection against water, mold and mildew stains. All coating products are water-based, non-flammable and contain no to low VOCs, toxins or irritants.

C2 Guard products are safe for the environment and emit low to no odor.

Protects up to 10 years on vertical wood surfaces

Protects from water intrusion
